Area

Total Area: _____m²

Total Length: _____m
(Including bevels)

Total Width: _____m
(Including bevels)

Assembly

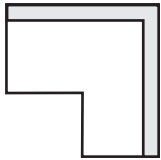

On Site
(Pre-cut with connectors)

Pre Assembled
(Pre-cut and glued. Total mat will be divided into sections with a maximum length per section of 5 meters due to weight.)

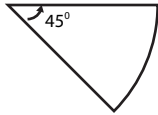

Sketch Elements

Please sketch your mat configuration and floor plan using the elements below.

Mats & Bevels

Curves & Angles

Existing Objects

Immovable Objects
Mat must be cut to fit. (e.g. walls or machinery)

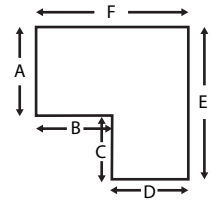

Movable Objects
Mat can extend slightly underneath if necessary. (e.g. worktables, conveyor belts)

Measurements

Indicate measurements in the table and corresponding letters in the drawing. Measurement unit in cm.

Example:

- A _____ cm
- B _____ cm
- C _____ cm
- D _____ cm
- E _____ cm
- F _____ cm
- G _____ cm
- H _____ cm
- I _____ cm
- J _____ cm
- K _____ cm
- L _____ cm

Comments

Cushion Ease Series

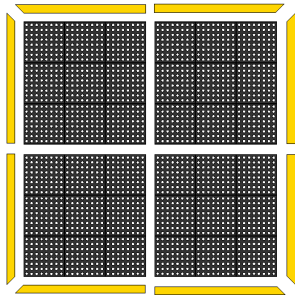

Product Specifications

Mat Dimensions:	91 cm x 91 cm
Thickness:	19 mm
Weight:	12.7 kg/mat
Color:	Black
Surface Pattern:	Open Version: Pebble with 25 mm holes Closed Version: Pebble

Available Compounds:

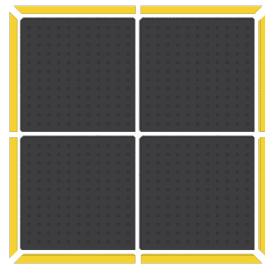

100% Natural Rubber	- for general purpose applications
100% Nitrile Rubber	- for resistance to industrial oils
ESD Natural Rubber	- for static protection applications
ESD Nitrile Rubber FR	- for static protection, fire protection and oil resistance
Nitrile Rubber FR	- for oil resistance and fire retardant
Nitrile Rubber FR with GSII	- for oil resistance and fire retardant with GripStep gritted surface

Available Components:

Cushion Ease
91 cm x 91 cm
Black, Red

Accessories
551 Male Bevel 91 cm x 5 cm
551 Female Bevel 91 cm x 5 cm
Yellow, Black, Red

Cushion Ease Solid
91 cm x 91 cm
Black

Accessories
551 Male Bevel 91 cm x 5 cm
551 Female Bevel 91 cm x 5 cm
Yellow, Black

Design Considerations

- The exact dimensions of the mat are 36 inches which converts to 91.4 cm. There is a tolerable size variance of +/- 2 mm. For exact customization that requires millimeter precision, cutting on site is recommended.
- Male connectors must align exactly with their corresponding female connectors to be able to connect mats. Mats cannot be shifted one connector up or down.
- Cushion Ease series has cutting lines with female connectors every 30 cm x 30 cm. Customization along these cutting lines allow male bevels to be attached.
- Bevelled safety ramps also have cutting guides every 30 cm to create straight connections, inner or outer corners.
- For customization that requires straight or diagonal cutting outside of these cutting lines, it is not possible to attach a bevel and cutting lines may cut through the holes of the Cushion Ease or the surface pattern of the Cushion Ease Solid. Please indicate on your order form whether this is acceptable.
